

Smarter Networks

Bohr

This is smart

>70 sensors, 30 in engine alone!

Safety:

- Cameras / Radar
- Blind spot sensors
- Tyre Pressure
- Airbags
- ...

Efficiency:

- Lambda / exhaust sensors
- Auto choke
- Start / stop technology
- ...

Predictive maintenance:

- Fuel gauge
- Oil warning light
- Engine warning light
- ...

Making gas networks smart?

What is accepted today

- <200 sensors to bill ~24,000,000 consumers!
- Rare, but painful issues occur
 - Unaccounted for gas
 - Leakage / PRE
 - Supply contamination / disruption / other

Needed to be smart and resilient for the future

- Low-cost sensors
 - Pressure, Calorific Value, Moisture, Leakage, Vibration, ...
- Easy deployment
- Information about everything, to deliver:
 - Safety
 - Efficiency
 - Predictive maintenance

(We are developing low-cost sensors, to be easily deployed at scale and generate this valuable data, for a smarter network)

Bohr

Drive smart!
